

Porthpean Sailing Club

Tow Truck

September 2024

When towing be sure to:

- Check the safety boat is hitched properly with the ball hitch and safety chain
- Check all mirrors are working
- Have someone in the vehicle to spot for hazards, pedestrians etc.
- Get your spotter to check behind the safety boat when reversing
- On the beach use low range and four-wheel drive
- Do not use difflock unless towing in a straight line
- When pulling up boats always have a spotter in the vehicle with you.
- Do not pull away without checking all boats are secure and the tow line is clear of people not involved
- Proceed with caution at a slow pace and be aware of pedestrians at all times
